Dear prospective student,

The Stenden University of Applied Sciences is looking forward to welcoming you in Emmen.

This letter is important for students with any disability like ADHD, ADD, autism or a physical restriction, for example chronic fatigue.

Students with a disability deserve extra attention at the beginning of a new study. Maybe they will need some extra facilities to support their studies. Stenden University of Applied Sciences is willing to take care.

If so, please contact one of the student counselors immediately after the start of your study, by writing a message to nynke.vink@stenden.com or ellie.bal@stenden.com. An appointment will be scheduled.

Please bring an official medical document to prove your disability.

Yours sincerely,

Nynke Vink and Ellie Bal
